Higher Education in Asia, 2014 As demand for tertiary education continues to rise across Asia, countries are expanding their higher education systems outwards by constructing new universities, hiring more faculty and encouraging private provision. Many of these systems are also moving upwards by introducing new graduate programmes to ensure that there are enough qualified professors and researchers for the future. Based on data from the UNESCO Institute for Statistics (UIS) and a diverse range of national and international sources, this report provides a comprehensive view to evaluate different strategies to expand graduate education. Special focus is given to middle-income countries in the region which have recently experienced the most dramatic growth through an innovative mix of policies. For example, interventions aimed at improving university rankings may be controversial but are nonetheless reshaping university reforms. The report highlights the pros and cons by comparing the three most commonly-used university ranking systems. Across the region, countries are not simply seeking to accommodate more students - they are striving to build top-quality universities that can produce the research and workforce needed for national economic development. So this report presents a range of data to better evaluate the economic benefits flowing from university research, as well as the spillover effects to the private sector. The authors also analyse the ways in which international collaboration can boost the productivity and quality of university-based research. Overall, this report provides the data and analysis to help countries weigh the balance of different policies to expand their higher education systems.

India, that is Bharat J Sai Deepak, 2021-08-15 India, That Is Bharat, the first book of a comprehensive trilogy, explores the influence of European 'colonial consciousness' (or 'coloniality'), in particular its religious and racial roots, on Bharat as the successor state to the Indic civilisation and the origins of the Indian Constitution. It lays the foundation for its sequels by covering the period between the Age of Discovery, marked by Christopher Columbus' expedition in 1492, and the reshaping of Bharat through a British-made constitution-the Government of India Act of 1919. This includes international developments leading to the founding of the League of Nations by Western powers that tangibly impacted this journey. Further, this work also traces the origins of seemingly universal constructs such as 'toleration', 'secularism' and 'humanism' to Christian

political theology. Their subsequent role in subverting the indigenous Indic consciousness through a secularised and universalised Reformation, that is, constitutionalism, is examined. It also puts forth the concept of Middle Eastern coloniality, which preceded its European variant and allies with it in the context of Bharat to advance their shared antipathy towards the Indic worldview. In order to liberate Bharat's distinctive indigeneity, 'decoloniality' is presented as a civilisational imperative in the spheres of nature, religion, culture, history, education, language and, crucially, in the realm of constitutionalism.

Developing Next-Generation Countermeasures for Homeland Security Threat Prevention Dawson, Maurice, Kisku, Dakshina Ranjan, Gupta, Phalguni, Sing, Jamuna Kanta, Li, Weifeng, 2016-08-30 In the modern world, natural disasters are becoming more commonplace, unmanned systems are becoming the norm, and terrorism and espionage are increasingly taking place online. All of these threats have made it necessary for governments and organizations to steel themselves against these threats in innovative ways. *Developing Next-Generation Countermeasures for Homeland Security Threat Prevention* provides relevant theoretical frameworks and empirical research outlining potential threats while exploring their appropriate countermeasures. This relevant publication takes a broad perspective, from network security, surveillance, reconnaissance, and physical security, all topics are considered with equal weight. Ideal for policy makers, IT professionals, engineers, NGO operators, and graduate students, this book provides an in-depth look into the threats facing modern society and the methods to avoid them.

IIT JEE Physics (1978 To 2018) Shraddhesh Chaturvedi, Jitender Singh, 2018-07-22 Bring conceptual clarity and develop the skills to approach any unseen problem, step by step. - HC Verma Great Book to read and understand! Quality explanations and methodical approach separates this book from the rest. A clear winner in its category. - Review on Amazon Must have book for every IIT JEE aspirant! There are many solution books available in the market but this book is a class apart. Solutions are explained in detail. In many questions there are extra points which are beneficial for aspirants. - Review on Amazon Written by IITians, foreword by Dr HC Verma and appreciated by students as well as teachers. Two IITian have worked together to provide a high quality Physics problem book to Indian students. It is an indispensable collection of previous 41 years IIT questions and their illustrated solutions for any serious aspirant. The success of this work lies in making the readers capable to solve complex problems using few basic principles. The readers are also asked to attempt variations of the solved problems to help them understand the concepts better. The students can use the book as a readily available mentor for providing hints or complete solutions as per their needs. Key features of the book are: Concept building by problem solving. The solutions reveals all the critical points. 1400+ solved problems from IIT JEE. The book contains all questions and their solutions. Topic-wise content arrangement to enables IIT preparation with school education. Promotes self learning. Can be used as a readily available mentor for solutions.

Advances in Friction-Stir Welding and Processing M.-K. Besharati-Givi, P. Asadi, 2014-12-08 Friction-stir welding (FSW) is

a solid-state joining process primarily used on aluminum, and is also widely used for joining dissimilar metals such as aluminum, magnesium, copper and ferrous alloys. Recently, a friction-stir processing (FSP) technique based on FSW has been used for microstructural modifications, the homogenized and refined microstructure along with the reduced porosity resulting in improved mechanical properties. Advances in friction-stir welding and processing deals with the processes involved in different metals and polymers, including their microstructural and mechanical properties, wear and corrosion behavior, heat flow, and simulation. The book is structured into ten chapters, covering applications of the technology; tool and welding design; material and heat flow; microstructural evolution; mechanical properties; corrosion behavior and wear properties. Later chapters cover mechanical alloying and FSP as a welding and casting repair technique; optimization and simulation of artificial neural networks; and FSW and FSP of polymers. Provides studies of the microstructural, mechanical, corrosion and wear properties of friction-stir welded and processed materials Considers heat generation, heat flow and material flow Covers simulation of FSW/FSP and use of artificial neural network in FSW/FSP

Sustainable Assessment of Alternative Sites for the Construction of a Waste Incineration Plant by Applying WASPAS Method with Single-Valued Neutrosophic Set Edmundas Kazimieras Zavadskas, Romualdas Baušys, Marius Lazauskas, The principles of sustainability have become particularly important in the construction, real estate maintenance sector, and all areas of life in recent years. The one of the major problem of urban territories that domestic and construction waste of generated products cannot be removed automatically. The above necessity induces the demand of systems and technologies for waste life cycle and proper disposal development. Siting of the waste incineration plant is a complex process, which includes all factors of sustainability principles. The selection of the construction area is a complex problem due to the existence of different tangible and intangible factors and the multiple alternatives available.

The Game Changers Yuvnesh Modi, Rahul Kumar, Alok Kothari, 2012-01-13 Entrepreneurship is not about breaking free from the 9 to 5 humdrum, not about being your own boss, and definitely not glorious. The entrepreneur shuns the comfort of a cushy corporate job and six figure salaries to set sail on uncharted waters with a single minded zeal and only an idea as an anchor. But it is this idea and passion that makes all the difference and catapults them into a world of infinite possibilities. The Game Changers brings to you 20 success stories of IITians who went on to live the big dream. These include: Suhas Patil, Vijay Kumar, Vinod Gupta, Sam Dalal, Sridhar Mitta, Arjun Malhotra, Kiran Seth, Prabhakant Sinha, Ranbir Singh Gupta, Bikram Dasgupta founder of Globsyn, Praful Kulkarni, Sunil Gaitonde, Anand Deshpande, Arvind Kejriwal, Harish Hande, Anuradha Acharya, Venkata Subramanian, Bikash Barai, Vikram Kumar, and Krishna Mehra. With a foreword by Dr Duvvuri Subbarao, Governor, Reserve Bank of India, and introduction by Damodar Acharya, Director, IIT Karagpur, this book marks the 60 golden years of India's finest institute. Come, be a part of their journey, get inspired to dream and make your own story.

Management for Sustainable Development Carolina Machado, J. Paulo Davim, 2022-09-01 Today, increasingly more, the word sustainability is present in all kinds of discussions: at home, at work, at school, in all society. Conscious of the environment where we live everybody looks to find the best solutions to solve problems that result from Human Being evolution. Management for a sustainable development appears as a process from which organizations try to use all its resources, as well as improve its organizational and technological development, in order to answer not only to the present but also to future human and social needs. Only in this way is it possible to improve the quality of life. Seen in this way, sustainable development is understood to be people centred. We have a special concern with cultural, social and economic dimensions, where individuals can develop, together as a society, whilst at the same time individual and organizational activities can be implemented without destroying the present diversity and complexity of the ecological system where we live. Taking into account these concerns, this book looks to cover issues related to the management for sustainable

development in a context where organizations are continually facing high challenges for what concerns the items related to, amongst others, the re-use, recycling, waste reduction, add value, low costs and time of production, sustainable behaviour, not only in an environmental perspective but also in an organizational perspective. Today's organizations can no longer develop their practices based in the existent paradigms. On the contrary, it is necessary to completely break from these paradigms, creating a total change of mentality in the way we manage the organizational activities. Taking into account this reality, managing for a sustainable development appears as a management philosophy focused in productivity improvement considering different kinds of goals, such as biological, economic and social systems goals. Conscious of this reality, this book contributes to the exchange of experiences and perspectives about the state of research related to the management for a sustainable development, as well as the future direction of this research field. It looks to provide a support to academics and researchers, as well as those operating in the management field and who need to deal with policies and strategies related to sustainable development issues.

Renewable Energy Forecasting Georges Kariniotakis, 2017-09-29 Renewable Energy Forecasting: From Models to Applications provides an overview of the state-of-the-art of renewable energy forecasting technology and its applications. After an introduction to the principles of meteorology and renewable energy generation, groups of chapters address forecasting models, very short-term forecasting, forecasting of extremes, and longer term forecasting. The final part of the book focuses on important applications of forecasting for power system management and in energy markets. Due to shrinking fossil fuel reserves and concerns about climate change, renewable energy holds an increasing share of the energy mix. Solar, wind, wave, and hydro energy are dependent on highly variable weather conditions, so their increased penetration will lead to strong fluctuations in the power injected into the electricity grid, which needs to be managed. Reliable, high quality forecasts of renewable power generation are therefore essential for the smooth integration of large amounts of solar, wind, wave, and hydropower into the grid as well as for the profitability and effectiveness of such renewable energy projects. Offers comprehensive coverage of wind, solar, wave, and hydropower forecasting in one convenient volume Addresses a topic that is growing in importance, given the increasing penetration of renewable energy in many countries Reviews state-of-the-science techniques for renewable energy forecasting Contains chapters on operational applications

L2 Writing Beyond English Nur Yiğitoğlu Aptoula, Melinda Reichelt, 2019-04-10 Most of what we know about writing in a second or foreign language (L2) is based on conclusions drawn from research on L2 writing in English. However, a significant quantity of L2 writing and writing instruction takes place in languages other than English and so there is a need for studies that look beyond English. The chapters in this book focus on languages other than English and investigate curricular issues, multiple languages in contact/conflict in L2 writing instruction and student attitudes toward pedagogical

practices. The collection as a whole makes a valuable contribution to the study of L2 writing, and it will also prove an essential resource for instructors of second and foreign language writing.

Advances in Urbanism, Smart Cities, and Sustainability Uday Chatterjee, Arindam Biswas, Jenia Mukherjee, Sushobhan Majumdar, 2022-04-21 While technology is developing at a fast pace, urban planners and cities are still behind in finding effective ways to use technology to address citizen's needs. Multiple aspects of sustainable urbanism are brought together in this book, along with advanced technologies and their connections to urban planning and management. It integrates urban studies, smart cities, AI, IoT, remote sensing, and GIS. Highlights include land use planning, spatial planning, and ecosystem-based information to improve economic opportunities. Urban planners and engineers will understand the use of AI in disaster management and the use of GIS in finding suitable landfill sites for sustainable waste management. Features Explains the process of urban heritage conservation, including the process of urban renewal and its regeneration and the role of citizens in urban renewal, planning, and management. Includes several case studies highlighting urban environmental problems and challenges in developed and developing countries and the ways for converting urban areas into smart cities. Focuses on urban resources, the supply of energy in smart cities, and their proper management practices. Introduces the role of remote sensing, GIS, and IoT in making a smart city and meeting sustainable goals. Analyzes unique case studies, their challenges and obstacles, and proposes a set of factors to understanding smart city initiatives and projects.

The Oxford Handbook of Disability History Michael A. Rembis, Catherine Jean Kudlick, Kim E. Nielsen, 2018 This Handbook brings together twenty-nine authors from around the world, each expert in a different area within the history of disability. This collection of new and original essays forms a benchmark in a field of historical inquiry that has been growing and maturing over the last thirty years. It is the first book to gather critical essays that incorporate studies from South and East Asia, eastern and western Europe, Australia, North America, and the Arab world. This Handbook is unique among other disability history texts in that it engages simultaneously in methodological and historiographic debates and in a further articulation and analysis of the lived experiences of disabled people.

Higher Education Across Asia Asian Development Bank, 2011-11-01 Higher education (HE) is seen to have an ever more important role in human resource development and the movement of people, students, and the workforce in the region. The Asian Development Bank's developing member countries are increasing investment in HE to support social and economic development and growth. This publication discusses the issues and strategies for HE in Asia and why there is a need to invest in this subsector. It provides an overview on how governments, together with HE institutions and stakeholders, can improve HE through adequate policies and regulations, and how they can position their economies for further development.

Statistical Models in Earth Sciences B K Sahu, 2015-06-02 In this book, the author has given some introduction to the nature of complexities and processes within Earth Sciences and some of these are modeled through probabilistic and statistical methods using linear process. These are best exemplified through the use of axiomatic probability using univariate statistical methodology for scalar random variables and multivariate statistical methods for vector random variables. Several real geological examples are included in this book, which have been solved or partially solved to exemplify applications for solutions of specific earth science problems. The aim of these examples is to help the student to conceptually appreciate the problem and realistically formulate a simple mathematical model for its solution. In addition, several exercises are given at the end of each chapter so that the student can independently solve some advanced problems. This book will also be useful to professional Earth Scientists in formulating models and using statistical methods to make appropriate decisions in their chosen fields.
