Convict Conditioning-Paul Wade 2012-11-15 Â How to Train As If Your VERY LIFE Depended on Your Degree of REAL Strength, Power and Toughness Â Most physical training systems are designed for the domesticated human animal. That is to say, for us humans who live lives of such relative security that we cultivate our strength and power more out of pride and for a sense of accomplishment than out of an absolute need to survive in the wild. The professional athlete hones his body to function well in a sports event—rather than to emerge safe from a life-or-death struggle. And even those in our military and LEO rely more on the security of their weapons and armor than on their own personal, raw power and brute strength to carry the day. Â There remains one environment where exuding the necessary degree of authoritative strength and power can mean the difference between life or death: the maximum security prison. In maximum security, the predator preys on the weak like we breathe air. Intimidation is the daily currency. You either become a professional victim or you develop that supreme survival strength that signals the predator to stay at bay. Â Paul Wade spent 19 years in hell holes like San Quentin, Angola and Marion. He entered this world a gangly, terrorized weakling and he graduated to final freedom, pound-for-pound one of the strongest humans on the planet. Paul Wade dedicated his prison life to the cultivation of that supreme survival strength. And ironically, it is in America's prisons that we can find some of the great, lost secrets of how to get immensely powerful and strong. Paul Wade mined these secrets as if his life depended on it—and of course in many ways it did. Â Finally free, Paul Wade pays his debt to society—not just with the horrors of his years in the hole—but with the greatest gift he could possibly give us: a priceless set of progressions that can take ANYONE who has the will from abject weakling to strength specimen extraordinaire. Â InÁConvict ConditioningÁPaul Wade has laid out a logical and effective zero to hero progression in key bodyweight strength exercises and presented a solid training philosophy. Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini would answer desperation with ingenuity; suffering with hope, resolve, and humor; brutality with rebellion. His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. Appearing in paperback for the first time—with twenty arresting new photos and an extensive Q&A with the author—Unbroken is an unforgettable testament to the resilience of the human mind, body, and spirit, brought vividly to life by Seabiscuit author Laura Hillenbrand.

American Sniper- Chris Kyle 2012-01-03 The #1 New York Times bestselling memoir of U.S. Navy SEAL Chris Kyle, and the source for Clint Eastwood’s blockbuster movie which was nominated for six academy awards, including best picture. Superhuman—Rowan Hooper 2019-09-17 From evolutionary biologist Rowan Hooper, an awe-inspiring look into the extremes of human ability—and what they tell us about our own potential—“an intriguing…look at some of the things that make us human—and more” (Kirkus Reviews). In 1997, an endurance runner named Yiannis Kouros ran 188 miles in twenty-four hours. Akira Haraguchi can recite pi to the 100,000th decimal point. John Nunn was accepted to Oxford University at age fifteen. After a horrific attack by her estranged husband, Carmen Tarleton was left with burns to more than eighty percent of her body. After a three-month coma, multiple skin grafts, and successful face transplant, Tarleton is now a motivational speaker. What does it feel like to be exceptional? And what does it take to get there? Why can some people achieve greatness when others can’t, no matter how hard they try? Just how much potential does our species have? Evolutionary biologist Rowan Hooper has the answers. In Superhuman he takes us on a breathtaking tour of the peaks of human achievement that shows us what it feels like to be extraordinary—and what it takes to get there. Drawing on interviews with these “superhumans” and those who have studied them, Hooper assesses the science and genetics of peak potential. His case studies are as inspirational as they are varied, highlighting feats of endurance, strength, intelligence, and memory. Superhuman is “terrifically entertaining. Hooper is that precious thing; an easy, fluent, and funny scientist. The message from this upbeat, clever, feel good book is that we all have greater capacity than we realize. Spectacularly enjoyable” (The London Times), this is a fascinating, eye-opening, and inspiring celebration for anyone who ever felt that they might be able to do something extraordinary in life, for those who simply want to succeed, and for anyone interested in the sublime possibilities of humankind.

Fire in the Minds of Men-James H. Billington
1980 This book traces the origins of a faith—perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries—the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg.

Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared The New Republic hailed it as "remarkable, learned and lively," while The New Yorker noted that Billington "pays great attention to the lives and emotions of individuals and this makes his book absorbing." It is an invaluable work of history and contribution to our understanding of political life.
