The Interior Design Reference & Specification Book is divided into 18 sections:

- 1-2 - Building Systems and Construction Drawings
- 3-4 - Building Systems for Interior Designers
- 5-6 - Construction Drawings and Details for Interiors
- 7-8 - Roofs and Site Plans
- 9 - Schedules and Lists
- 10 - Enlarged Plans
- 11 - Advanced Floor Plans
- 12 - Reflected Ceiling Plans
- 13 - Perspective and Isometric Drawings
- 14 - Elevations and Revit Architecture 2018 for Designers
- 15-16 - Guidelines for Interior Design Business
- 17 - The Interior Design Business Environment
- 18 - The Interior Design Business Communications

The book is organized by sections, each of which contains detailed information and guidance for interior designers. The sections are further divided into chapters, each focusing on a specific topic or aspect of interior design. The book is designed to be a comprehensive resource for interior designers, providing information on a wide range of topics, from design principles and business management to technical aspects such as building systems and construction details.
