Psychiatric Nursing Care Plans - E-Book
Katherine M. Fortinash 2006-05-16 The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA’s six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

All-in-One Care Planning Resource-Pamela L. Swearingen 2012 The only book featuring nursing care plans for all core clinical areas, Swearingen’s All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing...
assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Nursing Diagnoses 2012-14 - NANDA International 2011-11-14 A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of
evidence-based, professionally-led nursing care - and to more effectively meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I’s Diagnosis Development Committee, with stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc.

Nursing Care Plans for Home Health Care-Debra Collins, RN, RAC-CT 2015-01-01 2015 Third Edition. 205 pages. 136 Home Health Nursing Care Plans with 39 Medication Care Plans in the book and on the CD. 23 Skilled Charting Guidelines. The Home Health nursing care plans and plan of care forms in this book cover every nursing diagnosis and care plan problem that may be generated from the OASIS-C form for the nursing plan of care. Also includes Pain Care manual.Terminology is based on OASIS-C language and nursing diagnosis definitions and classifications as outlined by the North American Nursing Diagnosis Association (NANDA). The home health nursing care plan format follows the care plan standards from the American Nurses Association. The first section of the book covers regulations and standards for nursing care plans, Home Health Nursing care plan components, and Quality Measures and Outcome Measures. Because the terminology of the home health nursing care plan is based on OASIS-C language, it is very easy to see which care plans and plan of care forms are triggered by the OASIS-C entries. The home health nursing care plans can be used to supplement the nursing plan of care, and are also extremely useful for teaching patients and caregivers.

Nursing Care Plans-Meg Gulanick 2021-02

Nursing Diagnosis-Lynda Juall Carpenito-Moyet

2006 Revised to incorporate the latest NANDA-approved nursing diagnoses, the Eleventh Edition of this classic text offers definitive guidance on key elements of nursing diagnosis and its application to clinical practice. Section 1 thoroughly explains the role of nursing diagnosis in the nursing process and in care planning. Section 2 is a comprehensive A-to-Z guide to current nursing diagnoses. Section 3 focuses on collaborative problems. This edition lists associated NIC (Nursing Interventions Classifications) and NOC (Nursing Outcomes Classifications) for every NANDA diagnosis. New diagnoses added and modified in accordance with the latest NANDA meeting are in an appendix for easy access.

Mosby's Electronic Care Plan Constructor-Elaine Kennedy 2004-08 Providing more than 90 standard plans of care for the most commonly occurring medical-surgical conditions in adults, this interactive CD-ROM helps users eliminate the time spent mechanically constructing plans of care. Ideal for both students and clinicians, this CD-ROM reflects the most current practice and professional standards in nursing, yet its level and format are extremely accessible. Users are offered three points of entry to begin constructing an individualized plan of client care - including the program's Client Database/Assessment Form, the Admitting Medical Diagnosis list, and the NANDA Nursing Diagnosis list. Each point of entry allows users to make selections, input and edit information specific to their client, and customize their care plans. Each care plan also includes expected outcomes, nursing interventions, rationales for
the most common nursing diagnoses, and client goals.
