Industrial Society and Its Future - Éditions Hache

18. Modern leftish philosophers tend to dismiss reason, science, objective reality and to insist that everything is culturally relative. It is true that one can ask serious ques-tions about the foundations of scientific knowledge and about how, if at all, the concept of objective reality can be defined. But it is obvious that modern leftish

Human history - Wikipedia

Human history (or world history) is the narrative of humanity's past. It is understood through archaeology, anthropology, genetics, linguistics, and (since the advent of writing) primary and secondary source documents.. Humanity's written history was preceded by its prehistory, beginning with the Palaeolithic ("Old Stone Age") era. This was followed by the Neolithic ("New ...

Ultra-processed foods, diet quality and human health

May 21, 2019 · The significance of industrial processing, and in particular techniques and ingredients developed or created by modern food science and technology, on the nature of food and on the state of human health, is generally understated. This is evident in international and national Organization. , ,

History of capitalism - Wikipedia

The history of capitalism is diverse. The concept of capitalism has many debated roots, but fully [quantify] fledged capitalism is generally thought by scholars to have emerged in Northwestern Europe, especially in Great Britain and the Netherlands.Over the following centuries, capital accumulated by a variety of methods, at a variety of scales, and became associated with much ...
