Landscape Change and Resource Utilization in East Asia Ts'ui-jung Liu, Andrea Janku, David Pietz, 2018-05-15 Covering the ancient period through to the 21st century, this book examines how landscapes have changed across East Asia over time. Featuring examples of a variety of landscapes, from the riverine and agricultural to the urban and aesthetic, this book thus presents a comprehensive review of East Asian environmental history. The eleven chapters, written by an international team of leading scholars, provide analysis of a wide range of spatial, temporal, and thematic considerations. Seeking to use the concept of landscape to evaluate the opportunities and constraints faced by East Asian communities, it also explores the relationship between landscape transformation and human agency. In so doing, it aims to survey the current methodology and scholarship in the field and demonstrate a new approach which encompasses socio-economic and cultural history, as well

as GIS-based geographical studies. Providing an in-depth examination of landscape change across the sub-regions of China and Japan, this book will be useful to students and scholars of Asian History and Environmental Studies.

Creating Smart Virtual Appliances with IBM Image Construction and Composition Tool Greg Hurlebaus, Rashed Ferdous, John Jacobson, Li-Fang Lee, Jarek Miszczyk, Pat Nickel, David Peraza, Moises Romo, Kerry Staples, IBM Redbooks, 2013-07-24 In a traditional deployment model, software is installed on a physical server, and it is configured for the particular data center environment. The cloud deployment model requires that the dependency on a specific hardware configuration is severed. This IBM® Redbooks® publication guides you through the transition from the traditional application deployment model to the cloud-friendly deployment model. It explains how to achieve these goals by packaging the software stacks into industry standard virtual appliances. A key part of this transition involves using the IBM Image Construction and Composition Tool. This tool is the IBM tool for creating virtualized workloads that target several private cloud deployment platforms, including platforms from IBM and not from IBM. In fact, this tool is unique in its ability to support such a wide range of cloud offerings. It is also the only tool in the marketplace that can create virtual appliances for both x86 and IBM Power hardware architectures. This book provides an in-depth look at the capabilities and internal workings of Image Construction and Composition Tool. It focuses on the capabilities of this tool, which target the virtualization and cloud offerings of IBM Systems and Technology Group. These offerings include IBM Systems Director VMControl™, IBM SmartCloud® Entry, and IBM PureFlex™ System with IBM Flex System Manager™ appliance. The Image Construction and Composition Tool also has a much richer set of capabilities. Specifically, it supports IBM Workload Deployer, IBM PureApplication™ Systems, and IBM SmartCloud Provisioning. This publication targets software architects, cloud solutions architects, and cloud administrators. Its goal is to provide you with the expert-level skills required to package the existing and newly created applications into self-configurable, smart virtual appliances. Cross-Taiwan Straits Relations Since 1979 Kevin G. Cai, 2011 With the KMT regaining power from the DPP on May 20, 2008, both Beijing and Taipei have been adjusting their policies toward each other. However, these recent changes can be seen as part of the overall ongoing process of policy adjustment in both Beijing and Taipei, in response to changing domestic and external conditions since the 1980s. This book explores the process of attitude change and policy adjustment on both sides of the Straits since the 1980s and offers policy recommendations.

Surveys in Differential-Algebraic Equations IV Achim Ilchmann, Timo Reis, 2017-03-08 The present volume comprises survey articles on various fields of Differential-Algebraic Equations (DAEs) which have widespread applications in controlled dynamical systems, especially in mechanical and electrical engineering and a strong relation to (ordinary) differential equations. The individual chapters provide reviews, presentations of the current state of research and new concepts in -

History of DAEs - DAE aspects of mechanical multibody systems - Model reduction of DAEs - Observability for DAEs - Numerical Analysis for DAEs The results are presented in an accessible style, making this book suitable not only for active researchers but also for graduate students (with a good knowledge of the basic principles of DAEs) for self-study.

Changing Taiwanese Identities J. Bruce Jacobs, Peter Kang, 2017-08-03 The peoples of Taiwan have been influenced by many different cultures and migrations throughout the island's history. In the 20th and early 21st centuries especially it has been a stage for cultural and ethnic conflict, not least because of the arrival of mainland Chinese fleeing the Chinese Communist Revolution. The subsequent tensions between those who see Taiwan as a natural territory of China and those who would prefer to see it remain independent have brought to the fore questions of what it is to be 'Taiwanese'. This book addresses the question of how Taiwanese identities have changed after the Taiwanization process which began in the 1990s. It also examines the impact of this process on cross-strait relations between Taiwan and the People's Republic of China after the return of the Kuomintang to power after 2008 and the Sunflower movement in 2014. The various contributors between them cover a range of topics including the waves of migration to Taiwan, changes of political regimes, generational differences and social movements. Taken as a whole, this book presents a nuanced picture of the patchwork of identities which exist in contemporary Taiwan.

.NET Internationalization Guy Smith-Ferrier, 2006-08-07 As business becomes more and more global, software developers increasingly need to make applications multi-lingual and culturally aware. The .NET Framework may well have the most comprehensive support for internationalization and globalization of any development platform to date, and .NET Internationalization teaches developers how to unlock and utilize that support. Experienced international application developer Guy Smith-Ferrier covers the internationalization of both Windows Forms and ASP.NET applications, using both Versions 1.1 and 2.0 of the .NET Framework. Smith-Ferrier not only teaches you the best ways to take advantage of the globalization and internationalization features built in to the .NET Framework and Visual Studio, he also provides original code to take globalized applications to the next level of international utility and maintainability. Key topics include • An introduction to the internationalization process and how localization and globalization are supported in Windows and the .NET Framework • The use of resource managers, cultures, resource DLLs, and localized strings, images, and files—including strongly typed resources • Detailed coverage of form localization in Windows Forms and Web Forms • Dealing with regional cultures and their casing, collation, and calendars • Managing right-to-left Middle-Eastern text and pictographic East Asian languages • How to use the book's original resource administration utilities • How to translate resources with machine translation • How to create custom cultures and integrate them with the .NET Framework 2.0 and Visual Studio 2005 • How resource managers work and how to write custom resource managers, including a resource manager that uses a database • How to test your internationalization with FxCop using new and existing globalization rules •

How to effectively include the translator in the internationalization process Whether you are a developer, architect, or manager, if you are involved in international applications with the .NET Framework, this is the one book you need to read and understand before you start development. Guy Smith-Ferrier is an author, developer, trainer, and speaker with more than 20 years of software engineering experience. He has internationalized applications in four development platforms, including the .NET Framework. A frequent conference speaker, Guy is the author of C# and .NET courseware and has written numerous articles. You can read his blog at www.guysmithferrier.com.

Truly Human Scott E. Simon, 2023-04-28 The Sediq and Truku Indigenous peoples on the mountainous island of Formosa – today called Taiwan – say that their ancestors emerged in the beginning of time from Pusu Qhuni, a tree-covered boulder in the highlands. Living in the mountain forests, they observed the sacred law of Gaya, seeking equilibrium with other humans, the spirits, animals, and plants. They developed a politics in which each community preserved its autonomy and sharing was valued more highly than personal accumulation of goods or power. These lifeworlds were shattered by colonialism, capitalist development, and cultural imperialism in the twentieth century. Based on two decades of ethnographic field research, *Truly Human* portrays these peoples' lifeworlds, teachings, political struggles for recognition, and relations with non-human animals. Taking seriously their ontological claims that Gaya offers moral guidance to all humans, Scott E. Simon reflects on what this particular form of Indigenous resurgence reveals about human rights, sovereignty, and the good of all kind. *Truly Human* contributes to a decolonizing anthropology at a time when all humans need Indigenous land-based teachings more than ever.

Redefining the Role of Language in a Globalized World Wang, Ai-Ling, 2021-01-22 Language, while seemingly static, is dynamic and ever-changing, necessitating adaptability in various fields of language studies. It is especially true in a globalized world and an information age. In the field of language and its applications, it is essential to reconsider and redefine existing issues and envision how the changes may have impacts on human beings and on the entire globe. *Redefining the Role of Language in a Globalized World* is an essential scholarly publication that explores the role language will play in a globalized world and how language changes over time through its interdependent relationship with technology. Featuring a wide range of topics such as bilingualism, native speaker prejudice, and social inequality, this book is essential for educators, linguists, researchers, curriculum designers, academicians, policymakers, librarians, and students.

Constitutional Convergence in East Asia Po Jen Yap, Chien-Chih Lin, 2021-11-25 Explains why the constitutional jurisprudence of Hong Kong, Taiwan, and South Korea is converging, and provides analysis of relevant case law.

Managing Innovation and Cultural Management in the Digital Era Rua-Huan Tsaih, Tzu-Shian Han, 2016-01-29 The world-class National Palace Museum (NPM) in Taiwan possesses a repository of the largest collection of Chinese cultural treasures of outstanding quality. Through implementing a two-organizational restructuring, and shifting its operational focus from

being object-oriented to public-centered, it aims to capture the attention of people and promote awareness of the culture and traditions of China. In this vein, the NPM combines its expertise in museum service with the possibilities afforded by Information Technology (IT). This book analyses the research results of a team sponsored by the National Science Council in Taiwan to observe the development processes and accomplishments, and to conduct scientific researches covering not only the technology and management disciplines, but also the humanities and social science disciplines. The development process of new digital content and IT-enabled services of NPM would be a useful benchmark for museums, cultural and creative organizations and traditional organizations in Taiwan and around the world.

Institutionalization of World-Class University in Global Competition Jung Cheol Shin, Barbara M. Kehm, 2012-11-27 Moving the academic debate on from its current focus on development to a more nuanced sociological perspective, this fresh research is a collaboration between academics in South Korea and Germany that assesses the factors shaping world-class universities as institutional social systems as well as national cultural treasures. The work explores in detail how WCUs have moved to a central position in policy circles, and how these often ambitious government policies on WCUs have been interpreted and adopted by university administrators and individual professors. The authors provide a wealth of empirical data on universities, both world-class and aiming for WCU status, in a range of polities and continents. They compare strategies for developing WCUs in countries of the East and the West, both developing and developed. Nations featured in the statistical purview include nine countries (Germany, France, Japan, South Korea, China, Taiwan, Malaysia, Singapore and Hong Kong SAR). The volume goes further than merely taking a snapshot of the current situation, offering detailed and considered strategies and rationales for institutionalizing and developing WCUs, particularly in Asian countries where Confucian cultural influences accord education the highest priority.

Unicode Explained Jukka K. Korpela, 2006-06-21 Fundamentally, computers just deal with numbers. They store letters and other characters by assigning a number for each one. There are hundreds of different encoding systems for mapping characters to numbers, but Unicode promises a single mapping. Unicode enables a single software product or website to be targeted across multiple platforms, languages and countries without re-engineering. It's no wonder that industry giants like Apple, Hewlett-Packard, IBM and Microsoft have all adopted Unicode. Containing everything you need to understand Unicode, this comprehensive reference from O'Reilly takes you on a detailed guide through the complex character world. For starters, it explains how to identify and classify characters - whether they're common, uncommon, or exotic. It then shows you how to type them, utilize their properties, and process character data in a robust manner. The book is broken up into three distinct parts. The first few chapters provide you with a tutorial presentation of Unicode and character data. It gives you a firm grasp of the terminology you need to reference various components, including character sets, fonts and encodings, glyphs and character repertoires. The middle section offers more detailed information about using Unicode and other

character codes. It explains the principles and methods of defining character codes, describes some of the widely used codes, and presents code conversion techniques. It also discusses properties of characters, collation and sorting, line breaking rules and Unicode encodings. The final four chapters cover more advanced material, such as programming to support Unicode. You simply can't afford to be without the nuggets of valuable information detailed in Unicode Explained.

Life and Moral Education in Greater China John Chi-Kin Lee, Stephen Yam-wing Yip, Raymond Ho-Man Kong, 2021-03-30
Arguing for life, moral and values education as a bedrock for the original goals of school education, this monograph explores how life and values education is conceptualised and imparted in Greater China. Under a globalized, transnational, and technological world, where there has been an increase in people's mobility, in information and cultural exchanges, there is also a growing emphasis on personal and professional ethics. Against this context, life, moral and values education has gained attention for its impact on shaping students' characters as future citizens. However, the cultivation of these values is made deeply diversified and complex by varying interpretations of life education and values education across societies, given that different societies are influenced by different socio-cultural traditions, educational ideologies and religious beliefs. The means and approaches towards life education also vary vastly from formal school subjects, school-based programmes as well as teachers and peers' role modelling, community services, extra-curricular activities, school discipline, charity work, pastoral care, and school ethos. Recognising this inherent diversity and complexity in the approach to and the dissemination of life education, the contributors to this volume survey the practice of life education in Greater China so far, suggesting that life education is most effective when it is diversified, dynamic and developmental across contexts. This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China.

Earthquakes ,2018-10-31 An earthquake is the shaking of the surface of the Earth, resulting from the sudden release of energy in the Earth's lithosphere that creates seismic waves. Earthquakes can range in size from those that are so weak that they cannot be felt to those violent enough to toss people around and destroy the whole cities. At the Earth's surface, earthquakes manifest themselves by shaking and sometimes displacement of the ground. When the epicenter of a large earthquake is located offshore, the seabed may be displaced sufficiently to cause a tsunami. Earthquakes can also trigger landslides and occasionally volcanic activity. Earthquakes are caused not only by rupture of geological faults but also by other events such as volcanic activity, landslides, mine blasts, and nuclear tests. This book addresses the multidisciplinary topic of earthquake hazards and risk, one of the fastest growing, relevant, and applied fields of research and study practiced within the geosciences and environment. This book addresses principles, concepts, and paradigms of earthquakes, as well as operational terms, materials, tools, techniques, and methods including processes, procedures, and implications.
